

Dear Dave,

Dec. 15, 2008.

David & I would like to thank you and your crew for the wonderful experience we shared during the erection of our timber-frame addition. Everyone worked so diligently to complete the project as quickly as possible, & with a high degree of craftsmanship. From conception, to final engineering, everything was handled with exceptional detail and personal care. The quality of work and attention to detail by you and your crew were by far exemplary.

David says, as senior superintendent for one of North America's leading general contractors, he was impressed your professionalism, craftsmanship and precision to detail. For myself, the personalities of your crew were a joy to work with. Everyone was respectful and sensitive to our personal space and belongings, and had manners anyone's grandma would be proud of. We were both sad to see you all leave.

David and I would highly recommend you, and the crew of Kettle River Timberworks to anyone interested in building a timberframe home.

With Highest Regards,

David & Kelly Jamieson
Chilliwack, B.C.
